PROFILE

Analytical and solution-driven Data Science postgraduate specializing in Artificial Intelligence frameworks and Machine Learning engineering. Technical expertise includes data manipulation with Python (Pandas, NumPy), predictive modeling with Scikit-learn, and relational database querying via SQL. Passionate about applying supervised and unsupervised learning algorithms to automate processes and deploy intelligent systems.

EDUCATION

Vellore Institute of Technology	2024 – 2026
Master of Science in Data Science CGPA-7.3	
KMG college of arts and Science	2020 – 2023
Bachelor of Science in Computer Science CGPA-7.4	

TECHNICAL SKILLS

- **Languages & Databases:** Python, SQL
- **Data Visualization:** Power BI, Tableau, Matplotlib, Seaborn
- **Tools & AI Workflows:** Git, GitHub, Jupyter Notebook, Microsoft Excel, Microsoft Office, Microsoft Word, Claude (AI Prompting & Workflow Automation)

PROJECTS

Indian Stock Market AI Decision & Paper Trading System

Technologies: Python, Flask, SQLite, Machine Learning, SHAP, Natural Language Processing (NLP)

- Engineered predictive machine learning models combining technical indicators (RSI, MACD), corporate metrics, and news sentiment analysis via NLP to forecast asset movements.
- Deployed an interactive full-stack Flask web dashboard featuring real-time data charts, SHAP explainable AI plots, and a simulated paper trading engine.

Explainable Loan Predictor

Technologies: Python, Streamlit, SQLite3, LightGBM, XGBoost, Random Forest, Logistic Regression, Scikit-learn, SHAP, FPDF2, Joblib, Pandas, NumPy, Matplotlib, Seaborn

- Developed an automated loan prediction system using Python and optimized LightGBM/XGBoost classifiers to achieve an 85.42% test accuracy via Randomized SearchCV and advanced feature engineering.
- Deployed the workflow as a multi-page Streamlit web dashboard integrating a secure SQLite database for admin overrides, interactive SHAP explainable AI plots, demographic fairness audits, and automated FPDF2 PDF report generation
